CDAC MUMBAI

Lab Assignment

SECTION 1: Error-Driven Learning Assignment: Loop Errors

Instructions:

Analyze each code snippet for errors or unexpected behavior. For each snippet, determine:

- 1. Why does the error or unexpected behavior occur?
- 2. How can the code be corrected to achieve the intended behavior?

Snippet 1:

```
public class InfiniteForLoop {
   public static void main(String[] args) {
     for (int i = 0; i < 10; i--) {
        System.out.println(i);
     }
   }
}
// Error to investigate: Why does this loop run infinitely? How should the loop control variable be adjusted?</pre>
```

Snippet 2:

```
public class IncorrectWhileCondition {
   public static void main(String[] args) {
     int count = 5;
     while (count = 0) {
        System.out.println(count);
        count--;
     }
   }
}
// Error to investigate: Why does the loop not execute as expected? What is the issue with the condition in the `while` loop?
```

Snippet 3:

```
public class DoWhileIncorrectCondition {
   public static void main(String[] args) {
     int num = 0;
     do {
        System.out.println(num);
        num++;
     } while (num > 0);
```

```
}

// Error to investigate: Why does the loop only execute once? What is wrong with the loop condition in the `dowhile` loop?
```

Snippet 4:

```
public class OffByOneErrorForLoop {
   public static void main(String[] args) {
      for (int i = 1; i <= 10; i++) {
         System.out.println(i);
      }
      // Expected: 10 iterations with numbers 1 to 10
      // Actual: Prints numbers 1 to 10, but the task expected only 1 to 9
   }
}
// Error to investigate: What is the issue with the loop boundaries? How should the loop be adjusted to meet the expected output?</pre>
```

Snippet 5:

```
public class WrongInitializationForLoop {
   public static void main(String[] args) {
      for (int i = 10; i >= 0; i++) {
            System.out.println(i);
      }
   }
}
// Error to investigate: Why does this loop not print numbers in the expected order? What is the problem with the initialization and update statements in the `for` loop?
```

Snippet 6:

Snippet 7:

```
public class UninitializedWhileLoop {
  public static void main(String[] args) {
    int count;
```

Snippet 8:

```
public class OffByOneDoWhileLoop {
   public static void main(String[] args) {
     int num = 1;
     do {
        System.out.println(num);
        num--;
     } while (num > 0);
}

// Error to investigate: Why does this loop print unexpected numbers? What adjustments are needed to print the numbers from 1 to 5?
```

Snippet 9:

```
public class InfiniteForLoopUpdate {
   public static void main(String[] args) {
      for (int i = 0; i < 5; i += 2) {
            System.out.println(i);
      }
   }
}
// Error to investigate: Why does the loop print unexpected results or run infinitely? How should the loop update expression be corrected?</pre>
```

Snippet 10:

```
public class IncorrectWhileLoopControl {
    public static void main(String[] args) {
        int num = 10;
        while (num = 10) {
            System.out.println(num);
            num--;
        }
    }
}
// Error to investigate: Why does the loop execute indefinitely? What is wrong with the loop condition?
```

Snippet 11:

```
public class IncorrectLoopUpdate {
   public static void main(String[] args) {
      int i = 0;
      while (i < 5) {
            System.out.println(i);
            i += 2; // Error: This may cause unexpected results in output
      }
   }
}
// Error to investigate: What will be the output of this loop? How should the loop variable be updated to achieve the desired result?</pre>
```

Snippet 12:

```
public class LoopVariableScope {
   public static void main(String[] args) {
      for (int i = 0; i < 5; i++) {
        int x = i * 2;
      }
      System.out.println(x); // Error: 'x' is not accessible here
   }
}
// Error to investigate: Why does the variable 'x' cause a compilation error? How does scope</pre>
```

SECTION 2: Guess the Output

Instructions:

- 1. **Perform a Dry Run:** Carefully trace the execution of each code snippet manually to determine the output.
- 2. Write Down Your Observations: Document each step of your dry run, including the values of variables at each stage of execution.
- 3. Guess the Output: Based on your dry run, provide the expected output of the code.
- 4. **Submit Your Assignment:** Provide your dry run steps along with the guessed output for each code snippet.

Snippet 1:

```
public class NestedLoopOutput {
  public static void main(String[] args) {
    for (int i = 1; i <= 3; i++) {
      for (int j = 1; j <= 2; j++) {
            System.out.print(i + "" + j + "");
        }
        System.out.println();
    }
}
```

```
}
}
// Guess the output of this nested loop.
```

Snippet 2:

```
public class DecrementingLoop {
   public static void main(String[] args) {
     int total = 0;
     for (int i = 5; i > 0; i--) {
        total += i;
        if (i == 3) continue;
        total -= 1;
     }
     System.out.println(total);
   }
}
// Guess the output of this loop.
```

Snippet 3:

```
public class WhileLoopBreak {
   public static void main(String[] args) {
     int count = 0;
     while (count < 5) {
        System.out.print(count + " ");
        count++;
        if (count == 3) break;
     }
     System.out.println(count);
   }
}
// Guess the output of this while loop.</pre>
```

Snippet 4:

```
public class DoWhileLoop {
  public static void main(String[] args) {
    int i = 1;
    do {
       System.out.print(i + " ");
       i++;
    } while (i < 5);
    System.out.println(i);
  }
}
// Guess the output of this do-while loop.</pre>
```

Snippet 5:

```
public class ConditionalLoopOutput {
  public static void main(String[] args) {
    int num = 1;
    for (int i = 1; i <= 4; i++) {
      if (i % 2 == 0) {
         num += i;
      } else {
         num -= i;
      }
    }
    System.out.println(num);
  }
}</pre>
```

Snippet 6:

```
public class IncrementDecrement {
   public static void main(String[] args) {
     int x = 5;
     int y = ++x - x--+--x + x++;
     System.out.println(y);
   }
}
// Guess the output of this code snippet.
```

Snippet 7:

```
public class NestedIncrement {
   public static void main(String[] args) {
     int a = 10;
     int b = 5;
     int result = ++a * b-- - --a + b++;
     System.out.println(result);
   }
}
// Guess the output of this code snippet.
```

Snippet 8:

```
public class LoopIncrement {
   public static void main(String[] args) {
     int count = 0;
     for (int i = 0; i < 4; i++) {
        count += i++ - ++i;
     }
     System.out.println(count);
}</pre>
```

```
}
// Guess the output of this code snippet.
```

SECTION 3: Lamborghini Exercise:

Instructions:

- 1. Complete Each Program: Write a Java program for each of the tasks listed below.
- 2. **Test Your Code:** Make sure your code runs correctly and produces the expected output.
- 3. Submit Your Solutions: Provide the complete code for each task along with sample output.

Tasks:

- 1. Write a program to calculate the sum of the first 50 natural numbers.
- 2. Write a program to compute the factorial of the number 10.
- 3. Write a program to print all multiples of 7 between 1 and 100.
- 4. Write a program to reverse the digits of the number 1234. The output should be 4321.
- 5. Write a program to print the Fibonacci sequence up to the number 21.
- 6. Write a program to find and print the first 5 prime numbers.
- 7. Write a program to calculate the sum of the digits of the number 9876. The output should be 30 (9 + 8 + 7 + 6).
- 8. Write a program to count down from 10 to 0, printing each number.
- 9. Write a program to find and print the largest digit in the number 4825.
- 10. Write a program to print all even numbers between 1 and 50.
- 11. Write a Java program to demonstrate the use of both pre-increment and post-decrement operators in a single expression
- 12. Write a program to draw the following pattern:

***** ***** ***** *****

13. Write a program to print the following pattern:

```
1
2*2
3*3*3
4*4*4*4
5*5*5*5*5
5*5*5*5*5
4*4*4*4
3*3*3
2*2
```

14. Write a program to print the following pattern:

**

15. Write a program to print the following pattern:

**

16. Write a program to print the following pattern:

*

17. Write a program to print the following pattern:

***** *** ***

18. Write a program to print the following pattern:

*

19. Write a program to print the following pattern:

1 1*2 1*2*3 1*2*3*4 1*2*3*4*5

20. Write a program to print the following pattern: 5 5*4 5*4*3 5*4*3*2 5*4*3*2*1 21. Write a program to print the following pattern: 1 1*3 1*3*5 1*3*5*7 1*3*5*7*9 22. Write a program to print the following pattern: ***** ***** **** ***** ***** 23. Write a program to print the following pattern: 11111 22222 33333 44444 55555 24. Write a program to print the following pattern: 1 22 333 4444 55555 25. Write a program to print the following pattern: 1 12 123 1234 12345 26. Write a program to print the following pattern:
